

ECOLOGICAL RESTORATION

OUR EXPERIENCE

Sydney Harbour Ecological Restoration (*Sydney Harbour Federation Trust*) Ecological Restoration, Bushland Management and Fauna Management (nest box installation) at: North Head Sanctuary, Middle Head, Georges Heights, Chowder Bay, Cockatoo Island and Woolwich Docks.

Sydney Desalination Plant, Conservation Area Vegetation Management, (*Veolia*) WEW undertakes weed management, bushland planning, restoration and monitoring of a site supporting endangered fauna populations of Green and Golden Bell Frogs and Grey headed Flying Foxes.

City Wide Ecological Restoration Works (*Willoughby City Council*) WEW implements bushland management strategies at various sites in the Willoughby local government area, in accordance with Willoughby City Council's Bushland Management Plan over a 10-year period.

Fred Hollows Reserve Coogee Ecological Restoration (*Randwick City Council*) WEW undertake works in this large reserve located in a south facing gully. Works include primary and maintenance weeding of weeds of national significance using hand weeding and herbicide treatment, target weeding and maintenance of erosion and sediment control measures.

Badangi and Cremorne Point Reserves Ecological Restoration (*North Sydney Council*) WEW has undertaken bushland management works on these two reserves since 2003. Works included weed management, regeneration and creekline rehabilitation ecological burn preparation, post fire weeding, nest box installation and monitoring.

Maintenance of Bushfire Asset Protection Zones (APZ) in 6 sites (*Hornsby Shire Council*) WEW undertake bushland management for the maintenance of APZs to reduce bushfire fuel loads in Thornleigh and Normanhurst. The work includes target weeding, maintenance weeding using hand weeding and herbicide treatment, under pruning of trees and slashing of understorey.

Ecological Restoration Foreshore Catchment (*Mosman Council*) WEW undertake ecological restoration including primary and maintenance weeding and revegetation across an entire catchment of foreshore reserves extending from the Spit Bridge along the western foreshore to Quakers Hat Bay. The reserves managed include Spit Reserve, Quakers Hat Bay south, Quakers Hat Park and Quakers Hat Bay north and Joel's Reserve.

Sutherland Shire Bush Regeneration Works (*Sutherland Shire Council*) WEW have recently won a place on the Sutherland Shire Bush Regeneration Panel. Works to date have included weed treatment and bush regeneration at Burnum Burnum Wetland in Woronora.

Waterside Estate Riparian Riparian Land Management and Maintenance (*Len Robinson Strata & Community Management and the Waterside Community Organisation*) Since 2014 WEW has been maintaining the riparian lands at waterside activities have included weed treatment, aquatic plant management, planting and vegetation control.
